*1970*

*To everything there is a  
season, and a time to every  
purpose under the heaven:*

*Ecclesiastes 3:1—11*

*A time to be born and a time to die; a time to plant;  
and a time to pluck up that which is planted.*

*A time to kill and a time to heal;  
a time to break down,  
and a time to build up.*

*A time to weep and a time to laugh*

*A time to mourn and a time to dance.*

*... a time to embrace, a time to refrain from embracing,  
a time to get and a time to lose;  
a time to keep, and a time to cast away.*

*A time to love,  
and a time to hate,  
a time of war,  
and a time of peace.*

*He hath made everything beautiful in his time;  
also he hath set the world in their heart,  
so that no man can find out the work that God maketh  
from the beginning to the end.*

## Dedication

These past three years have been filled with many experiences, details, and persons; yet when all else may be forgotten and names dimmed with years — your face will remain clear in our hearts and minds.

You who comforted, encouraged, and stood beside us when no one else dared . . .

You whose very presence seemed to radiate re-assurance and understanding . . .

You who proved that compassion is a reality and not merely a word . . .

In lieu of all this the Senior Class of 1970 proudly dedicates this edition of the Mercilite to you—Mrs. Mary Gross, for your unfaltering faith and guidance.

*Mrs. Mary Gross*

*Memories are merely thoughts,  
that echo of the past . . .  
And though we start our lives anew,  
the memories shall last . . .  
Soon there will be just bits and pieces,  
remembered by a few . . .  
Of days gone by when you were young  
of things you used to do . . .  
Hopefully, as you progress,  
a wisdom-time will bring . . .  
Then perhaps you'll think of these as days,  
of youth . . . and joy . . . and spring . . .*

*Medical —  
Surgical  
Nursing*

*"I promise this won't hurt a bit."*

*"These new computers are great, how do we use them?"*

*Perhaps the largest area of nursing education is the area of medical-surgical nursing. Here the student is involved in the integration of all units of patient care. She is concerned with the physical, social, psychological, moral, economic and rehabilitative aspects of the patient. The course carries the student from the most simple procedures to the complex.*

## *Geriatric Nursing*

*A ride in a wheelchair is often an exciting experience for the oldster.*

*It's the little things that count!*

*There is no other person in the hospital who needs specialized care more than the oldster. Here the student can take the time to listen and to learn. She develops skill in communications as well as nursing arts. The student learns to note changes brought on by the aging process as well as proper nursing care for these Senior Citizens who have so much to offer the world.*

## *Obstetrical Nursing*

*The only trouble with a delivery is cleaning!*

*There is nothing quite like watching the birth of a brand new human being. The student working in the Obstetrical Field of Nursing often experiences a feeling of maternal warmth.*

*The aim of this unit of nursing education is to orientate the students in the care of obstetrical patient in all fields: Labor, delivery, and post-partum, as well as the care of the newborn.*

*Most students agree there is nothing like OB.*

# Pediatric Nursing

*Children have a wide variety of toys on Peds.*

*The care of sick children not only involves physical care, but also involves the emotional care of the child and the family. Students in this unit of nursing often find themselves becoming attached to their small patients.*

*The aim of this branch of nursing is to help the student attain skill in the comprehensive nursing care of the infants and children who come to the hospital seeking medical help. Here every aspect of the patient must be taken into consideration and the nurse must call upon numerous resources in order to efficiently care for her patients.*

*"Is the time up yet?"*

*"We forgot to get the patient!"*

## *Surgical Nursing*

*By rotating through the Operating Room, the student acquaints herself with the surgical environment by actively participating in operative techniques, and post-operative care. She learns to assist the surgeon and maintain an atmosphere of calmness in the surgical environment.*

## *Recovery Room*

*"Get the needle and we'll get this started".*

*The post-operative management of the surgical patient is one of the most vital services a nurse can offer her patient. The nurse can effectively guide her patient from an anesthetic state back into consciousness and reassure him that the ordeal is finished and he has come out ok. She learns to use the equipment available in order to assure her patient of a quick, safe recovery.*

# Inhalation Therapy

*The student, in rotating through Inhalation therapy learns how the inhalation therapist helps her patient to breathe or to rid himself of the effort of breathing on his own. Here she gets an example of each type of equipment and what to expect when the treatment is terminated.*

*"When we get into the room, you show the patient how to use it."*

*"You know what happens when you use these, don't you?"*

# Physical Therapy

*The Physical Therapy department takes a great deal of work off the nursing personnel in dealing with the direct physical rehabilitation for patients requiring further help. She familiarizes herself with the use of water and paraffin baths, heat lamps and hot packs as forms of treatment. The therapist also demonstrates active and passive exercises, as well as gait training and other forms of walker training.*

*"Don't worry, you are in good hands Mrs. Doe."*

## *Intensive Care Nursing*

*The patient is very sick and he needs your care, the care only an intensive care nurse can give and you are prepared and willing to help even if it means paying attention to more minute details. The care of the terminally ill, critically ill, or acutely ill patient is an art students learn to master when working in the Intensive Care Unit. Here the student learns to correlate all her nursing knowledge in order to provide the intensive care these patients need. She learns to keep an up to the minute report on her patients, formulate plans to provide continuity in his care, and be able to meet any emergency that may arise.*

# Coronary Care Unit

*"Sometimes when I sit here I begin to hear this funny beating sound in my ears."*

*The heart—the most vital organ in the human body has finally found a specialized unit for its care. In the coronary care unit the student learns to provide excellent nursing care for the patient in a cardiac emergency as well as nursing care for the patient with a cardiac disease. She learns to pick out various arrhythmia catastrophes as depicted on the monitors. In a specialized program she learns to work efficiently in the cardiopulmonary resuscitation along with other team members. To care is to learn how to care for an anxious patient and his family.*

*The apprehensive patient is greeted by cool efficiency.*

## *Emergency Room*

*An emergency is a situation that requires immediate attention. The student rotating through this clinical area learns to initiate life-saving procedures and provide immediate nursing care to alleviate pain and anxiety until the physician arrives. She learns to meet emergencies as they occur on the wards and nursing units in the hospital as well as any she may meet outside the hospital. This area requires quick, sure and exact nursing care.*

# *Psychiatric Nursing*

*Broughton Hospital*

*"The deepest need of man, then, is the need to overcome his separateness, to leave the prison of his aloneness."*

# Clinical Experience

*"Not to see what lies dimly  
at a distance, but to do  
what lies clearly at hand."*

*All our dandelion days are done  
and so we'll run the fields no more  
in search of wild roses  
that grow out on the moor.*

*All our dandelion days are done  
and so we'll turn our heads away  
from every silver morning  
and every golden day.*

*But sweet September's open arms  
belonged to us and held us once.  
Remember when the summertime  
sang songs to us and only us.*

*All our dandelion days are done  
and so we'll run the fields no more  
for all the wild roses  
have withered on the moor.*

*Rod McKuen . . .*

*"Today must have  
been hamburger  
day in the cafeteria!"*

*"And today I feel like  
I've been through every  
one of 'em."*
